ACCESSORIES

Another catalog and we're still stronger than ever! After our beginnings with Japanese motorbikes and refined stainless steel accessories we have derived to the Harley Davidsons and Indians with black matt accessories.

We have been evolving maintaining the rigid saddlebags, but now focusing in semifarings and crash bar protectors.

Under the umbrella of Puig, taking advantage of their experience in the world of windshields and semifarings, after more than 50 years in the market fitting out the Moto GP world champion since many years ago; we have developed semifarings homologated by the German TÜV which improves the aesthetic, safety and riding of your motorbike.

And this is just the beginning. Be part of our history and follow us on Instagram.

Let's walk together!

Part# **IL0001N**

HOMOLOGATED

MATERIAL: Plastic

DIMENSIONS:
Height: 46 mm. | Length: 42 mm.

LÁGRIMA Model

MODEL	PART#	N
CRYSTAL CLEAR BY PAIR	IL0001N	(*)

AVAILABLE COLORS | **J** Chrome | **N** Black

IMPORTANT: Code color required at the end of the reference indicating color requested **(IR0001J)**

Part# **IC0001N**

HOMOLOGATED

MATERIAL: Metallic

DIMENSIONS:
Length: 70 mm. | Diameter: 31 mm.

CRUZ Model

MODEL	PART#	N
CRYSTAL CLEAR BY PAIR	IC0001N	(*)

Part# **IF0001**

HOMOLOGATED

MATERIAL: Plastic

DIMENSIONS:
Length: 73 mm. | Diameter: 70 mm.

FLECHA Model

MODEL	PART#	J	N
CRYSTAL CLEAR BY PAIR	IF0001	(*)	(*)

Part# **IC0004**

NOT HOMOLOGATED

MATERIAL: Metallic

DIMENSIONS:
Length: 39 mm. | Width: 22 mm.

CÁPSULA-1 Model

MODEL	PART#	J	N
CRYSTAL CLEAR BY PAIR	IC0004	(*)	(*)

AVAILABLE COLORS | **J** Chrome | **N** Black

IMPORTANT: Code color required at the end of the reference indicating color requested **(IC0004N)**

Part# **IC0002N**

NOT HOMOLOGATED

MATERIAL: Metallic

DIMENSIONS:
Length: 66 mm. | Width: 24 mm.

CÁPSULA-2 Model

MODEL	PART#	N
CRYSTAL CLEAR BY PAIR	IC0002N	(*)

Part# **REC002N**

TURN SINGALS OFFSET

MODEL	PART#	N
UNIVERSAL	REC002N	(*)

AVAILABLE COLORS | **N** Black

IMPORTANT: Code color required at the end of the reference indicating color requested **(REC002N)**

MODEL	PART#	PRICE
RESISTORS SET OF 3'9 /25w FOR LEDS TURN SIGNALS	HO0001O	(*)
RESISTORS SET OF 25w FOR MOTORCYCLES THAT MOUNT REAR LEDS TURN SIGNALS, KEEPING ORIGINAL TURN SIGNALS	HO0002O	(*)
FLASHER RELAY 2 PINS	HO0003N	(*)
FLASHER RELAY 3 PINS	HO0004N	(*)
FLASHER RELAY 4 PINS	HO0005N	(*)

TECHNICAL INFO TURN SIGNALS CONNECTIONS

Most of the bikes use bi-metallics relay. Its frequency (which is the one that sets the pace of the turn signals) depend on the amperage circulating through the circuit. When replacing the turn signals from OEM to aftermarket ones which carry a difference in power, consequently they vary the amperage circulating through the circuit and that causes a change on the frequency of the turn signals rhythm. If otherwise, the motorcycle uses electronic relay (which frequency works independently from the amperage circulating through the circuit) the change of turn signals from OEM to aftermarket, should not affect the frequency of the turn signals rhythm.

· **Note:** we recommend in case of doubt of what type of relay the motorcycle uses, to check the turn signal rhythm after switching from OEM to aftermarket.

If the OEM turn signals are replaced by aftermarket ones that use incandescent bulbs, it is needed to check they use the same power. In case is different, it is needed to replace the turn signals bulbs for other that uses the same power as OEM ones. On our catalog, we have available bulbs of different power.

If the OEM turn signals are replaced by LED ones (of much less power than incandescent bulbs), we have two options to balance the frenquency of rhythm:

1. Incorporate a parallel relay in the right circuit and the other on the left circuit. If we replace four turn signals, it is needed to use a resistance part# HO0001O.

If otherwise, only two turn signals are replaced (one on each side), it is needed to use a resistance part# HO0002O.

The resistance are supplied with a scheme for a parallel connection.

· **Note:** On most of the bikes, the warning function of the bike is unabled if the resistance is used.

2. Identify the intermittence relay of the motorcycle (location and number of pins) and replace for its corresponding from the list supplied.

On most of the bikes, the warning functions works correctly when the relay is replaced.

· **Note:** some motorcycles in the market do not have a intermittence relay; obviously, in this case it cannot be replaced. Moreover, if on the blinking function intervenes more than one relay, it is possible that replacing only one relay does not solve the problem.

AVAILABLE COLORS | **N** Black | **O** Gold

IMPORTANT: Code color required at the end of the reference indicating color requested **(HO0003N)**

Part# **BU0001J**

DIAMETER: 95 mm.

Mod. **UNIVERSAL CLASSIC**
